The Propeller Fremont.-The Propelle Fremont is back from a successful trip, which is to be her last this season. She will lay up for the winter in the river below the city. We understand that her trips have been very profitsble, and that the experiment of running a propeller from this point to the principal lake ports below is satisfactory to all interested

New Music.-We have on our table a beau tiful piece of music just published, entitled Valse de Marghreita, prepared for the piano by Mr. FRED. H. Donn, of this city. Several m sical friends who are capable of judging in such matters, pronounce it an equisite piece of composition, and prophecy an extensive circulation. Mr. Donn is a devoted student of his art, and is already an amateur of no ordinary attain ments, and we hope that this, his first published effort, will be only the beginning of a series of popular musical compositions.

Shipments for November .- The season has been very unfavorable so far for shipments, held at Clyde, on Thursday, Jan. 24, 1867, at and the amount of farm produce sent from this 10.30 A. M. station of the C. & T. road this fall, has been scarcely half that of the corresponding months for a year or two preceding. The following is a statement for November for a few of the leading articles of export: 4 cars of wheat; 4 cars of oats; 5 cars of corn; 13 cars of lime; 1337 bushels lime; 443 barrels flour; 124 do cider; 60 do eggs; 423 do apples; 251 do dried apples,

Post-office Orders -According to recent instructions from the Post Master General. Postoffice orders are limited to \$150 to any one address from the same source on the same day Under the old arrangement large sums of money were sent by several different orders, and metimes caused great inconvenience to the smaller offices, by making drafts on them which exceeded their reserve. It is the intention of Postoffice Department to accommodate the people by making the transmittal of small sums

A Lead Mine, Perhaps .- In the lime-ston quarry of Mr. HENRY MYERS, three-fourths of mile west of town, lead ore, or some mineral like it, has been found, but whether it exists in paying quantities is a question not settled. The ime-stone, as it comes from the quarry, has lead running through it in seams. From a piece of stone about the size of a hen's egg, Dr. Snaw extracted, by melting in his crucible, a small quantity of the metal, enough to have made a buck-shot. Until we saw specimens from this quarry, we were under the impression that lead ore was never found mingled with other substances, but this proves to the contrary. It would be a matter of interest to have a scientific examination made of the quarry. Who knows but that a lead-mine may be dis-

Horrible Accident-Man Killed .- A distressing accident, resulting in the death of a worthy man, occurred in Genoa, on Friday last. He was released from the terrible position alive, and lingered until Saturday morning in great agony, when he died. We understand that he leaves a family in Genoa.

#### BELLEVUE.

The sermon was excellent and admirably Commotion Among the Distillers .- A correspondent writing from Bellevue last Tuesday says: Our usually quiet and prosperous village can furnish but little in the "news item" and Rev. A Barn Burned .- The barn of Mr. Jeaz MIAN GIBBS, who lives about a quarter of a mile north of the center of Riley township, was burned down on Tuesday of last week. The fire was discovered between four and five o'clock in the evening, but it had made so much headway that it was, of course, impossible to prevent the complete destruction of the building and contents. There were from forty to fifty tons of hav, a corn-sheller, fanning mill, hay pitchers, and other farming utensils in the barn, which were destroyed. Fortunately there was no stock in the building at the time. A lot of pigs under the floor were badly scorched. but escaped a premature complete roasting. The barn was of frame, with a large basement stable, and the loss, is from \$1,200 to \$1,400; insured in the Ohio Farmer's Company \$875, 00. The fire was the work of an incendiary.
